N.B. - L-type fitting is supplied only upon request.

They consist of:

- A brass stem for fastening the cup with support.
- A threaded sleeve equipped with two nuts, for the quick assembly of the cup holder to the lifting frame.
- A spring to cushion the impact of the cup and to keep at the same time a constant pressure with the load to be lifted.
- A rapid fitting for the connection to the suction hose.

Their main feature is their miniaturised sizing which allows weight and space reduction and also to use very small cups, assuring, with cups being equal, the same performances as the bigger series.

N.B.

Cups are not included in the following part numbers of the cup holder and therefore, they must be ordered separately.
