

[Basic cup holders with plunger valve]

They have the same mechanical features as the basic cup holders but are inclusive of a plunger valve, integral to a conical valve, which allows to produce vacuum in the cup only when it is in contact with the load to be lifted.

They are available for different cup diameters and, upon request, they can be made with stainless materials.

N.B.

Cups are not included in the following part numbers of the cup holder and therefore, they must be ordered separately.

The real strokes are:

C = 28	mm 16
C = 65	mm 49
C = 95	mm 74

Cup holder with rapid straight fitting for plastic hose $\varnothing 6 \times 8$
