

[Special cup holders]

Developed for lifting heavy bodies and to support hard and continuous duties in particularly dusty or damp environments, the special cup holders of this series consist of:

- A chromium plated steel stem for the fastening of the cup.
- A brass threaded support, with self-lubricating bushes, supplied with two ring nuts for fastening the cup holder to the machine.
- A spring to cushion the impact of the cup with the load to be lifted.
- A special cup, that can be supplied in different diameters and compounds, to be specified when ordering.

N.B.

Cups are not included in the following part numbers of the cup holder and therefore, they must be ordered separately.

The real strokes are:

C = 55	mm 37
C = 110	mm 84

Cup holder with rapid straight fitting for plastic hose
